

## **Documentation: Guidelines for a Perfect Vastu-Compliant House**

### **Purpose:**

**To create a harmonious and balanced living space by aligning architectural elements with Vastu Shastra principles, ensuring peace, prosperity, and well-being for the residents.**

---

## **Key Elements of a Perfect Vastu House**

### **1. Entrance**

- **Direction:**
    - **The main entrance should face North or East, as these directions allow the flow of positive energy and sunlight into the house.**
  - **Placement:**
    - **Ensure the entrance is free from obstructions like poles, trees, or clutter.**
  - **Design Tips:**
    - **The door should be grand and well-maintained, larger than other doors in the house.**
    - **Avoid placing the entrance directly opposite another home's entrance or in line with a staircase.**
- 

### **2. Staircase**

- **Direction:**
    - **Staircases should ideally be placed in the Southwest, South, or West parts of the house.**
  - **Design Guidelines:**
    - **The stairs must follow a clockwise direction when ascending.**
    - **Avoid placing staircases in the Northeast, as this disrupts the flow of energy.**
  - **Additional Tip:**
    - **The area beneath the staircase should not be used for storage or as a puja room.**
-

### 3. Kitchen

- **Direction:**
    - The kitchen should be located in the Southeast or South corner, as this represents the fire element.
    - The East is also suitable as it allows morning sunlight, which is beneficial for health.
  - **Cooking Orientation:**
    - The cook should face East while preparing food to harness positive energy.
  - **Avoid:**
    - Avoid placing the kitchen in the Northeast or Southwest, as it may disrupt the balance of elements.
  - **Remedy for Non-Compliance:**
    - Place a Vastu yantra or use colors like orange or red to balance the energy.
- 

### 4. Washrooms

- **Direction:**
    - Washrooms and toilets should be placed in the South or West directions.
  - **Placement Tips:**
    - Ensure they are not adjacent to or directly in front of the puja room or kitchen.
    - Maintain proper ventilation and cleanliness.
  - **Drainage:**
    - Drainage outlets should flow towards the South or West.
- 

### 5. Master Bedroom

- **Direction:**
    - The master bedroom should be in the Southwest corner of the house, which represents stability and strength.
  - **Placement Tips:**
    - The bed should be positioned so that the head faces South while sleeping.
    - Avoid mirrors directly facing the bed.
  - **Secondary Option:**
    - If the Southwest corner is unavailable, the West direction can also be considered.
-

## 6. Puja Room

- **Direction:**
    - The puja room must be located in the Northeast corner, known as the Ishaan corner, for spiritual growth and divine energy.
  - **Positioning Tips:**
    - Residents should face East or North while praying.
    - The puja room should not share a wall with a bathroom or toilet.
  - **Design Guidelines:**
    - Keep the space well-lit and clutter-free with a clean, sacred atmosphere.
- 

## 7. Water Tank and Storage

- **Water Tank Placement:**
    - Overhead water tanks should be in the Northwest or West direction, ensuring balance in the water element.
    - Avoid placing water tanks in the Northeast.
  - **Water Storage:**
    - Underground water storage or borewells should be placed in the North direction for prosperity.
- 

## 8. Drainage and Outlets

- **Direction:**
    - Drainage systems should direct water out of the house towards the South or West, as these directions represent elimination and disposal.
  - **Placement:**
    - Ensure proper slope in the flooring to guide water effectively to the desired outlets.
- 

## General Vastu Tips for Perfect Harmony

- **Lighting:**
  - Ensure ample natural light, especially in the East and North parts of the house.
- **Ventilation:**
  - Windows and ventilation openings should primarily be in the North and East directions.
- **Colors:**
  - Use colors that correspond to the direction:

- **North: Light green or blue.**
  - **East: Light yellow or beige.**
  - **Southwest: Earthy tones like brown or cream.**
  - **Remedies for Non-Compliance:**
    - **Use Vastu pyramids, yantras, or mirrors to counteract any structural non-compliance.**
    - **Place saltwater bowls in corners to absorb negativity.**
- 

## **Summary Layout Plan**

- 1. Entrance: North or East.**
- 2. Staircase: Southwest, South, or West; clockwise direction.**
- 3. Kitchen: Southeast or East; cook facing East.**
- 4. Washroom: South or West with drainage towards South or West.**
- 5. Master Bedroom: Southwest or West; head facing South.**
- 6. Puja Room: Northeast corner, facing East or North.**
- 7. Water Tank: Northwest or West (overhead); underground in the North.**
